## MiMa - Museum for Minerals and Mathematics

Explore the highlights of the travelling exhibition IMAGINARY: Interactive installations on algebraic geometry, symmetries and differential geometry. Picture gallery by mathematicians and artists from Germany, Austria, USA, Canada and France. Rapid prototyping 3D-sculptures of platonic solids and algebraic platonic stars. A locally made double-pendulum, a Penrose puzzle and a logic game. And discover the connection of minerals and mathematics through interactive applications or by flying through multiconnected spaces (atom structures of minerals).
